Met Office Aberdeen Meteorologist's View
Wind and rain will enhance chill affect.

Forecast for Saturday 04 Nov 2023
Weather: Most likely a dull day with outbreaks of rain becoming more widespread after dawn, although southernmost ranges may stay dry. However, there is a chance that drier brighter conditions will spread north. Most likely dry with some clear spells after dark.

Maximum wind: Light and variable.

Chance of cloud-free hill tops above 800m: 20-60%. Best chance on the south.

Low cloud and visibility: Most likely poor visibility to start with persistent cloud down to around 400-600m across northern ranges, perhaps above the summits in the south. A chance cloud will thin and break from the south through the day.

Temperature: **Glens:** Plus 5 Celsius rising to 8 Celsius.
At 800m: Plus 1 or 2 Celsius.
Freezing level: 1200-1300m.
